

KID'S

Help this wood duck find its nest.

ORNER

True or False

1. Tropical jungles are the only habitats with more wildlife than wetlands.
2. There are more wetlands than there were 200 years ago.
3. The wood duck is one of the few American ducks that nests in hollow trees.
4. The wood duck is Mississippi's official state waterfowl.

Math Activity

Let's say the Mississippi Department of Wildlife, Fisheries and Parks teamed up with Wildlife Mississippi to improve waterfowl habitat on the Gulf Coast. After habitat improvement, the marsh produces 240 ducklings a year. That is four times more ducklings produced than before marsh improvement. How many ducklings did the marsh produce the year before the habitat improvement?
